

MODEL CRS-2200, CRS-2210, CRS-2202 CRESCENT MOP SINK

The CRESCENT was designed around the two features most sought after by today's style and function conscious specifications.

Unique radial design, for extraordinary buildings. Provides more open space in the maintenance closet, reduces interference with door swing. 6" front drop with integral cast stainless steel cap on the threshold.

FEATURES

- Space efficient, radial designed corner model that occupies minimum floor space
- Maximum utility front drop with stainless steel cap that facilitates dumping of power equipment and reduces lifting of conventional equipment
- 12" Radial Type
