

MODEL EBR-66, EBR-74 ELFIN RECTANGULAR MOP SINK

The ELFIN is a rugged economical unit with plain curbs on all sides. It is installed quickly in one single operation on the finished floor. All models except the corner unit come with a 3” centered brass drain with removable flat stainless steel strainer and screws. The drain for the corner model is located 12” off the back walls to help avoid spills.

This unit can be furnished with aluminum or vinyl bumper guards, OR cast integral stainless steel caps, on the exposed sides of the basin. Please see the accessories section for additional information on the bumper guards. The ELFIN is available in four square models, one rectangular, and one corner model. The economical Elfin series with 6” high sidewalls is designed for applications that require solid value and low cost. The low profile is both durable and attractive.

FEATURES

- Terrazzo composed of pearl gray marble chips cast in white Portland cement which produces a compressive strength of 3000 PSI seven days after casting; then ground smooth, grouted and sealed to resist stains and moisture.
- Brass drain body is cast integral and provides for a caulked connection of not less than 1” deep to a 3” pipe.
- Drain is centered on all models and comes with a twist lock stainless steel strainer
- Installs on the finished floor – see instructions for details.
