

## WDA-3400, WDA-3410, WDA-3420 PARIAN ROLL-IN SHOWER FLOOR

Terrazzo's natural non-slip surface provides better footing and increased safety. Wheelchair shower floors are flanged on three sides for a water tight joint between the wall and shower floor. These shower floors must be set on a level grout or mortar bed.

### FEATURES

- Flanges are intended to be used with wall tile applied by others to conform with Federal, state and local shower stall dimensions
- A floor drain by others at the entrance to the sloped threshold and a collapsible water dam (Option: -RDM) are recommended for added protection

### ORDERING OPTIONS

Part Number

**WDA-**
