

SS-2424 Stainless Steel Mop Sink

The Stainless Steel mop basin provides ample space for all your mop cleaning needs. Despite its spacious size, it only weighs 50 lbs, making it lightweight and easy to handle during installation by just one person. The brushed finish not only gives it a professional look, but also helps to resist stains and corrosion. Incorporates unique sound deadening insulation on all enclosed sides to suppress noise during operation.

The included 2" brass compression drain with compression gasket eliminates the need for caulking, making installation even more convenient. The removable stainless-steel strainer adds an extra layer of convenience for maintenance.

FEATURES

- 18 Gauge apron with 20 gauge well and a 304 SS #4 brushed finish
- Complies with ASME A112.19.3/ CSA B45.4
