

BP BACK PANELS

Stern-Williams back panels are great for containing water splashes within any utility sink area, ensuring a cleaner and safer workspace by preventing water from spreading onto surrounding walls. Beyond enhancing cleanliness, the back panels play a crucial role in averting potential water damage which can lead to high maintenance costs later on. They provide wall protection against everyday use.

FEATURES

- 24 Gauge 304 Stainless Steel
- Redirects any liquid, splashed towards the wall, back into the mop sink.
- Safeguards all wall types against rips and punctures from harsh use.
- Stainless steel is virtually unaffected by most acidic or alkaline substances which may deteriorate guards made of other materials.
- Stainless steel material and finish is durable and maintenance free.
- Easy to seal and prevents water or chemicals from coming into contact with the surrounding wall.
