Drinking Fountains & Shower Towers

STERN-WILLIAMS

ABOUT

Stern-Williams Products, LLC opened for business in 1962, beginning only with a few terrazzo mop sink models, which we have gradually expanded to include one of the most complete lines of precast plumbing products. Stern-Williams is a manufacturer of terrazzo mop sinks, shower floors and cabinet packages, and a complete line of drinking fountains, shower towers, bottle fillers and pet fountains.

MISSION

We specialize in custom solutions designed to fit your space, your specs and your needs. Stern-Williams strives to provide "A" quality services and products and is committed to be your best supplier. Our customer service is US-based with live support when you need it.

VARIETY OF PRODUCTS

Stern-Williams manufactures a complete line of drinking fountains, outdoor misters, outdoor showers, foot showers, pet fountains, jug fillers, water bottle fillers, handwash stations, and more. Each product is fabricated at our plant in Carterville, MO by skilled, dedicated workers who take the time to make sure every product is the highest quality.

COLORS

We offer 11 standard color options for metal fountains, 4 options for aggregate fountains, and 8 color options for terrazzo wall-mounted fountains. Green is standard for metal drinking fountains and blue is standard for metal shower towers. Contact us to learn more about custom colors that fit your needs.

FOUNTAIN & SHOWER FAQs

What is the difference between Chrome Clear and Silver?

Chrome Clear is a white aluminum (RAL9006). Silver is a polished aluminum (HSS-2345).

Chrome Clear

Silver

What to do if water dribbles out of the bubbler or will not shut off.

If either of these occur, debris is most likely stuck in the push button valve seal. To fix, flush out system with a 5/32" hex wrench and adjust the set screw to full power for 30 seconds. For additional support, visit sternwilliams.com/videos/.

What is the flow rate of our drinking fountains and shower towers?

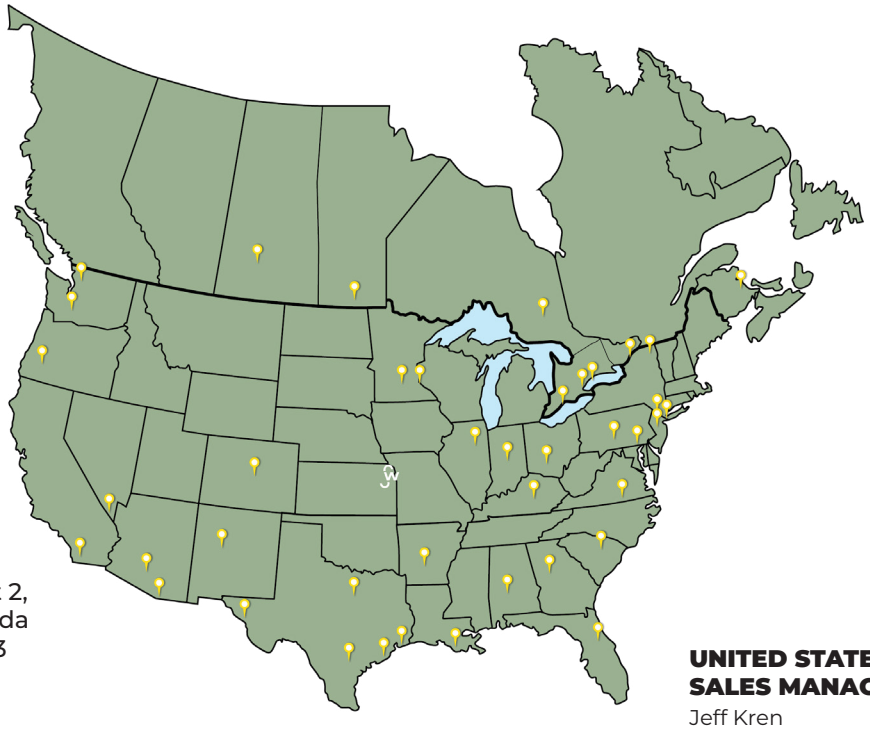

The flow rate of drinking fountains is 1.5 GPM, shower towers are 0.5 GPM and the flow rate of jug fillers are 6 GPM.

Why is water sitting in the fountain drain?

The drain is not angled enough for the water to flow out. To fix, unhook the drain line from the PVC elbow below the bowl and tilt the drain line towards the center to allow water to flow out.
